ALUMINUM

***Always Stain-free...***

***Over 15,000***

protected sites within the USA, Australia & Canada

# REACTION

1 Operator replaces the rod seals after a leak has occurred.

2 Steam cleaner washes oil from the wellhead deep into the soil.

3 Wellhead is clean but the underground soil remains contaminated.

4 Only surface soil is removed and replaced. Deeper contaminated layers are left behind.

5 Surface soil must be disposed at a recognized site.

**Wellsite clean-up repeated 6-12 months later and costs between \$3000-\$6000**

# PROACTION
